DETAILED ACTION

1. Applicant's election with traverse of group II in Paper No. 5 is acknowledged. The traversal is on the ground(s) that there is no serious burden on the Examiner. This is not found persuasive because they are classified differently. Searches throughout have some overlap but may not necessarily be coincident.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 29, 30, 32-36 are rejected under 35 U.S.C. 102(b) as being anticipated by King (1,910,296).

Regarding claim 29, King teaches a method of producing a retainer assembly comprising steps of providing a ball-lock insert assembly 21 for housing a resilient-biased engagement member and a holder plate 4 having an elongated mount opening. See Figs. 1 and 3.

Regarding claim 30, the mount opening is best seen in Fig. 1.

Regarding claim 32, a shank receiving opening 5 is best seen in Fig. 1.

Regarding claim 33, the shank receiving opening 5 and the mount opening intersect each other. See Fig. 1.

Regarding claim 34, the removable insert body 21 is in the elongated mount opening. See Fig. 1.

Regarding claim 35, the rear face of the holder place is attached to a backing plate 40. See Fig. 1.

Regarding claim 36, a second elongated mount opening for receiving a second ball-lock assembly is best seen in Fig. 8.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 31 is rejected under 35 U.S.C. 103(a) as being unpatentable over King (1,910,296) in view of Petri (3,707,303). King teaches everything but does not teach how to form the mount opening. Petri teaches forming a hole 9 by drilling. See col. 2, lines 19-33. Therefore, it would have been obvious to form the mount opening by drilling as taught by Petri.

Conclusion

Art Unit: 3724

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lucas (4,726,270), Shadowens (3,589,226), Wellman (5,181,438), Wallis (4,558,620), Moellering (5,357,835), Alden (1,910,275), Parker (3,176,998), Richard (2,160,676), Richard (2,166,559) teach ball lock retainers of general interest.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phong H Nguyen whose telephone number is 703-305-4989. The examiner can normally be reached on Mon-Fri.
